

Lisa Brown Named Business Development Representative For West Point Automation

West Point, Georgia---Lisa Brown was recently hired to sell IT Business Solutions for West Point Automation beginning March 8.

West Point Automation, a Business IT Company under West Point Industries specializes in identifying and resolving network failures, software installations and upgrades, work station additions/expansions and integrating new peripheral equipment (printers, scanners for companies.) West Point Automation also supports clients as needs arise with preventive maintenance to equipment, software installation and upgrades, trouble-shooting problems, coordinating with equipment vendors, and assisting with revisions to customer domain and usage policies.

"We are excited to have Lisa join our team. Lisa has experience with many businesses in West Point and the Greater Valley Area and she is aware of the growing demands for businesses to keep up with Information Technology," said West Point Automation IT Manager, Steve Dudley.

She has over 14 year's business experience in West Point. Since 2001, she was the Office Manager for A. Drew Ferguson IV, D.M.D., P.C., where she coordinated daily running of office and staff. She has also held positions at Powertel PCS, Inc. and InterCel.

Lisa holds an Associates degree in Business Management and Supervision from Southern Union State Community College and is currently at Columbus State University in West Point working on her Bachelors of Business Administration Accounting.

West Point Automation, solutions for Information Technology for businesses is a division of West Point Industries. West Point Industries, founded in 1868, is an engineering and manufacturing business located in West Point, Georgia. The company specializes in developing practical engineered solutions, designed for process improvements, safety and efficiency.
